## About This Game

**Homeless Simulator** is a homeless person simulator. Homeless persons are those who find themselves living on the streets because of family conflicts, somebody's fraud, loss of the job or health problems. They are those who need help. It is easy to find yourself living on the streets, but it is practically impossible to get out of such a life without help. The scene of the game is a small town in wintertime. The main task is to survive in those terrible conditions. You have to constantly monitor your body temperature, your hunger and thirst levels, hide yourself from the wind, and find places where you can stay overnight.

Excellent break game, as quick as solitaire but engaging much more of your brain, and deeply satisfying once it all clicks into place. I made a video: <https://www.youtube.com/watch?v=kT7bEJQsVYk&feature=youtu.be>. Fun the first time through by yourself. Even more fun with friends.. Can finally try to play. THANK YOU FOR FIXING. My logitech light up mouse lol plays it fine. Now to finally play it again after 200 years.. I thought this game looked cool and was nothing but disappointed.

It's basically Trial and Error - the game as there is little to no instruction and harsh punishments for messing up. This is basically memory game meets typing simulator. If I wanted to play trial and error I would do it with real programming and at least get a useful skill out of it.. It's always a good sign when I find myself repeatedly muttering the words "Hmmm. I actually really like this game" to myself when I'm playing something. Well, a good sign that it's a good game. Perhaps also the "first sign of madness", as they say. But we won't go there...

Since an eccentric little foray into 2D, Silent Hill-inspired "survival horror" entitled Lone Survivor came out in 2012, a number of other indie devs have attempted to capture a similar charm. While a couple have come reasonably close - last year's Claire comes to mind - The Coma may finally be a game which equals the inspiration of Jasper Byrne's little "neo-classic" (while also owing a tremendous amount to the "stealth horror" classic Clock Tower, as well as high school horror game Obscure and maybe, just maybe, the more recent DreadOut). While The Coma does very little which could be considered terribly "new", what it does it does very well.

It looks great, sounds great, and plays just fine too. It's scary enough - though it shouldn't stress any of you lightweights TOO much - and it also isn't that difficult really, until perhaps the very end, and might thereby be a rather good introduction to horror gaming for all of you thus far afraid to take the plunge. It's a fantastic little game which manages to find a balance between "cute" and "creepy" without compromising either, and is perfectly good value given the moderate length and substantial entertainment which it provides.

Sure, I could make a few minor complaints. The maps, for example, could take more cues from the likes of Silent Hill by showing you: a. where you've been, and b. where you can't enter (due to a barricade in a corridor, say, or something blocking a door "from the other side"). But on the whole, this still emerges as one of the more solid horror titles of recent years, and while that's not necessarily saying THAT much - it's been a quagmire of of late, let's face it - it'll still stand up pretty well in years to come, methinks, not least of all due to the frankly "ageless" art style it's chosen.

Nice job, Korea! You're certainly putting the vast majority of Europe to shame at this particular point in time...keep up the good work!

Verdict: 9/10.. Surprisingly catchy in many places. After playing the game for a while, several of these get stuck in your head!. The puzzles are challenging. However I'm not sure if it's linux version or what but the controller absolutely sucks. Not a single button on my controller could activate, bombs, levels, or phones. The rest is iffy at best. The navigation is hokey, and the d pad does not move you, despite the "hint" at the right. Could not find ANY option to exit game, even esc gave no option to exit game. Had to alt-tab and close.

Conclusion, although puzzles are challenging and the ONLY enjoyable part of the game, the controller and the rest are complete crap. Feel very poorly thought out and executed. (note could be for linux port only). Game is just not worthed.

---

I own the original Trackmania United. I played a lot of Stadium. I loved Canyon and I loved TM2 Stadium. I also enjoyed Turbo.

Lagoon is just not good enough of a Trackmania title. The visuals are too similar to Turbo.

The handling of the car is not my favorite. It feels too sticky and super responsive for a car of the size it is modeled. I was hoping for something more in line with TM Island, which is different from Stadium, but very fun to play at full speed and to drift on corners.

But the worst, the absolute worst that made me ask for a refund, is the performance. It will randomly stutter, at times during a turn, so you will get screwed of a good lap time because of the game performance, which just becomes frustrating.

---

A simple game, but another beloved replication of a historic classic. "Fox & Flock" is a simply yet cleverly animated recreation of a board game of antiquity, similarly named "Fox & Flock". The rules are practically identical, yet, having the anthropomorphized character to animate it really brings its concept "to life". Fox & Flock (and likewise, the real life Fox & Geese) is simple to learn, but hard to master.

A quick explanation:

The board is an equilateral cross shape, containing 33 spaces, interconnected by both orthogonal and diagonal lines. One player plays the "Geese" (or in this variant, the "Flock"). The Geese\Flock can only move one space at a time, orthogonally, but not diagonally. The Geese\Flock's 25 pieces start at the top, left, and right 3x3 boxes, cornered by the Fox, who starts at the centre of the bottom box. The Geese\Flock may not capture the Fox. Instead, they must outsmart\outmanoeuvre the Fox by escaping. To escape, they must use at least 9 of their 25 pieces, to fill in the bottom most box. If the Geese\Flock pulls this off, they win.

The other player, plays a single piece; The Fox. The Fox is "agile", and may move both orthogonally, as well as diagonally, but still, only one space at a time. The Fox is the only piece in the game, however, that may capture, and does so just like Checkers pieces do. If there is a Goose\Flock piece next to the Fox, the Fox may "jump them" to their other side. This may be diagonal, or orthogonal. However, if there is another Goose\Flock piece where The Fox would land, The Fox may not capture. Likewise, the Fox may not capture if the capture would cause the Fox to leave the playing surface. The Fox may also potentially chain captures, of indefinite lengths. If the Fox manages to capture at least 17 of the Geese\Flocks' pieces, before the Geese\Flock can use at least 9 to fill the lower square, the Geese\Flock will only have 8 left, and hence, the Fox wins.

This replication of the real life Fox and Geese game uses simply animated anthropomorphic characters to bring the game's concept to life, along with beautiful, atmospheric chamber music, aptly suited to the game's real life era and locale of origin.

A low cost purchase, and it runs on practically any Windows machine Windows XP and up. And a suiting purchase for any historic board game buff.

My only suggestion to the developer would be to add the option of a "classic board" mode, for those that might not want the anthropomorphic characters.

Otherwise, fantastic little game.

(Oh, and, don't let that fox git ya). An interesting game but becomes repetitive after a time. You learn which of the choices not to make. Could use a tutorial for the "combat" as currently you have to learn it "trial and error". Fun as long as you don't anticipate better graphics, a logical story, and just want to play without thinking too much.. **DO NOT LIKE - DO NOT PLAY!**. Pretty Girls Mahjong Solitaire is the epitome of games which have a high Quality:Price ratio. I bought this game and enjoyed it so much, I bought two more copies for two associates of mine, and they love it too.

The gameplay is compelling, but simplistic. This is part of the reason Pretty Girls Mahjong Solitaire is a quality product. It might seem like Mahjong Solitaire on the surface, but it has a true, deeper, meaning.

The graphics are fantastic. The tiles are HD. I want to shake the hand of the brilliant person(s) who designed the tiles so perfectly. There's also anime girls, too, if you care about that.

The sound design is perfect. The music is perfect, and the voice work is phenomenal. My only complaint is that it is pretty loud upon initial start-up.

Overall, if you have the money, this is a must buy. This game has the potential to become the next big thing - it just needs help getting there.. Definetly a fun game; think of it as a cross between Risk of Rain and Starbound, except it's wave survival.. never really got into MUDs before, but I am absolutely loving this game!

the game balances exploration and combat perfectly. it also does a very fine job of keeping things fresh, the amount of emotes one can choose from is almost overwhelming realistic-like seriously, players can select from more emotes than I've ever expressed in my actual life. really dig the environment as a whole.

overall this game is very entertaining and possibly addicting. i plan on getting this for a couple of my friends for the holidays.. This game will not work with recent NVIDIA PhysX drivers, it needs to use older drivers. NVIDIA broke backwards

---

compatibility with when they upgraded the API.

<http://www.hardcoregames.biz/frontlines-fuel-of-war/>

If you use the custom option to stop the NVIDIA driver update from changing the PhysX driver you should be OK with most titles.

The review mentions known versions of PhysX that this game works with.
